

Dear Patients,

Our clinic is a member of greenviu: The Green Clinic Society and is committed to sustainable health care.

A significant portion of the greenhouse gas emission of the health care sector is caused by travel of our patients and ourselves.

We can contribute to eco-friendly mobility concepts by synchronizing our appointments with the public transportation schedule.

The following public transportation options are available to reach our clinic:

Location	Type of public transportation	Stop	Distance from the public transportation stop to our clinic	Arrival/Departure intervals
Grand Rue 74	Bus Station	„Escaliers de la gare“	2 minutes	Each 15 minutes
Av. Des Alpes 45	Train Station	Plateform 3	3 minutes	Each 15 minutes

Thank you for your support which is vital in our quest to conserve the environment!

Information about greenviu: The Green Clinic Society:

greenviu is a global community of physicians, dentists, physical therapists, dental technicians and other health care providers with the mission to decrease the ecologic footprint of the health care sector based on scientific standards. It is important to combine procedural and hygiene standards with sustainability at a high level. Sustainable action is based on three concepts: reduction of energy consumption, replacement of non-sustainable expendable materials with sustainable items, and compensation of CO₂ emissions.
